We fail to see the anomaly of the present arrangement, but if there be any anomaly, it is one that works very well in practice and calls for no interference. To place the Straits and Hougkong under such a department as Mr. Conzon suggests would mean something very much like incorporation with the Indian Empire, a face from which we may well pray to be preserved, for it would mean increased taxation and less freedom of action. All the interests concerned are alike subject to the Government at home. and if Indian affairs have to be conducted through one department, Colonial affairs through another; and our relations with China through another, the same spirit governs them all; and in any serious crists it is not the head of a particular department but the Cubinet that determines! the policy that is to be pursued.

s such and 'n ad nousense. CRICKET AND THE PRESS.

The space, the attention, the descriptive reports, much for The Times scribbler. and the criticism which the newspapers of Engand have devoted to this pastime have done a very great deal to ensure the position which this recreation has taken among the diversions of a sport-loving people. "Cricaet reporting has done more to stimulate the game than any agency or i oldb in the world. Tis pleasant sure to see one's self in print, especially if one's achievements with either bat or ball are such as to look nise and rivet the eye of the reader. I admit that a big pair of spectacles is not exhibarating to a player, although the fear of seeing round cyphers attached to one's name increases a man's anxiety to score. Publicity to thousands of cricketers is as the breath of their nostrils, and anch matters. Is no johrnalist to write on cricke anles he has been a player of credit and renown Apply the argument in other directions. HAWAII WILL EXCLUDE COOLIE

POLICY CAUSED BY HOPE OF ANNEXATION.

Honolulu, 15th September, The Government has entered upon its new policy on the labour question and has taken a stand 🕠 that will have fur-reaching results in the political and industrial history of the fature. - Sucornetly stated, the first steps have been taken toward shutting out the further importation of oriental labour to these islands. The Government has been maturing its plans for some time, but a definite conclusion was not reached until day At the time mentioned the Cabinet met a

number of the leading planters of Hawsii, and at the close of the meeting, after prolonged discussion, the Government informed the planters that bereafter they must not expect to employ other than European labour on the plantations, as the republic of Hawaii would follow a policy which would have a direct tendency to shut out further oriental labour. Upon a question being asked the planters were informed that bereafter oriental labour would not be allowed in Hawaii. _In an interview with members of the Cabinet. Moreover, says The Times soribbler, "suc- it was learned this morning that the labour

THE STATISTICS OF SUICIDE.

Dealing with the "suioide enidemic" the British Medical Journal says it is reminded of the question alleged to have been put to the early philosophers at the Royal Society, why a gold tish might be put into a perfectly full bowl of water without causing it to overflow. Before discussing the causes of the alleged epidemic, it is as well to ascertain whother it exists. We find, on inquiry (says our contemporary), that the following are the figures which afford the information erreserved :-

Rates per Diaths by $1.0000.0^{\circ}0$ Year. Suicide. Persons Living. 1881 1955 1882 1965 1883 1962 1884 1886 2254 1**88**8 ... 1891 ...:.. 24×3

There appears to have been a gradual increase in the death rate from snicide for the past thirty years or more, but the rates for single years, of contrae, show marked fluctuations. The rates for 1891 and 1892 were 85 and 88 per 1,000,000 living respectively, and were distintly the highest recorded since 1858, the earliest year with which comparisons can be made, the near-st_rate to 1871-76 was 66 per 1,000,000

1881—85 ... 75

1886—90 ... 79

from year to year in the number of suicides in England, and to their tendency to increase, but they can hardly be held to justify the assumption that there exists either a spicidal mania or an epidemic of saicides. The fluctuations in the proportion of suicideswill be found to bear a pretty close relation to the culmination or decline of sanity and delusion. These reports, which to the

The above speaks for itself. From strict inquiry it appears that the benefit from using Kenting's Cough Lossages is understated. The operation was a specially severe one, and was performed by the specialist, Dr. H. T. Butlin, of et. Bartholomes's Hospital, Since the operation the only means of re-lief is the use of these Lorenges. So successful are they that one stords immediate benefit, although, State if the rupture is on the right, left, or both sides of the body, or at the navel, and about the size from the nature of the case the throat irritation is of the protution.
